The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply						
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the 1. basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

Application/Control Number: 10/743,723

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 2. Claims 14-27 are provisionally rejected under 35 U.S.C. 102(e) as being anticipated by O'Brien et al (Pub. No. US 2002/0013636A1) of application serial number 09/656255 filed on 9/6/2000.

O'Brien et al (Pub. No. US 2002/0013636A1) of application serial number 09/656255 filed on 9/6/2000 teach the claimed method of manufacturing a dental prosthesis using a pattern of a dental prosthesis from a wax material, and the claimed pattern and prosthesis made from the claimed methods.

Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Application/Control Number: 10/743,723 Page 3

Art Unit: 1725

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. Claims 14-27 are rejected under 35 U.S.C. 102(e) as anticipated by Rubbert et al or, in the alternative, under 35 U.S.C. 103(a) as obvious over Iiyama et al.

Rubbert et al (col. 54 lines 67+) teach the claimed method of manufacturing a dental prosthesis using a pattern of a dental prosthesis from a wax material, and the claimed pattern and prosthesis made from the claimed methods. Rubbert et al fail to teach the use of a marginal edge. However, Iiyama et al (col. 6, lines 1+) teach the use of a marginal edge of about 0. 2 to 2 mm for the purpose of making the margin of the dental prosthesis coincide with the margin line of the abutment tooth. It would have been obvious to one having ordinary skill in the art to provide Rubbert et al the use of a marginal edge as taught by Iiyama et al in order to of make the margin of the dental prosthesis coincide with the margin line of the abutment tooth.

Response to Arguments

Applicant's arguments filed on 8/11/05 have been fully considered but they are not persuasive. In response to applicant's argument that the cited art of US Patent application

Application/Control Number: 10/743,723

Art Unit: 1725

2002/0013636 filed on September 6, 2000 (now issued as US Patent 6,915,178) may cause interference with the current divisional application or the parent application 10/233,016 now issued as US Patent 6,691,764. However, there is no interference at al because US Patent application 2002/0013636 has an earlier filing date. Therefore, the provisional rejection of claims 14-27 under 35 U.S.C. 102(e) in paragraph 2 still applies. In response to applicant's argument that there is no suggestion to combine the references, the examiner recognizes that obviousness can only be established by combining or modifying the teachings of the prior art to produce the claimed invention where there is some teaching, suggestion, or motivation to do so found either in the references themselves or in the knowledge generally available to one of ordinary skill in the art. See In re Fine, 837 F.2d 1071, 5 USPQ2d 1596 (Fed. Cir. 1988) and In re Jones, 958 F.2d 347, 21 USPQ2d 1941 (Fed. Cir. 1992). In this case, applicant argued that Rubbert et al fail to teach the use of a marginal edge. However, Iiyama et al (col. 6, lines 1+) teach the use of a marginal edge of about 0. 2 to 2 mm for the purpose of making the margin of the dental prosthesis coincide with the margin line of the abutment tooth. It would have been obvious to one having ordinary skill in the art to provide Rubbert et al the use of a marginal edge as taught by Iiyama et al in order to of make the margin of the dental prosthesis coincide with the margin line of the abutment tooth.

6. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the Application/Control Number: 10/743,723

Art Unit: 1725

mailing date of this final action and the advisory action is not mailed until after the end of the

THREE-MONTH shortened statutory period, then the shortened statutory period will expire on

the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be

calculated from the mailing date of the advisory action. In no event, however, will the statutory

period for reply expire later than SIX MONTHS from the mailing date of this final action.

Conclusion

7. Any inquiry concerning this communication or earlier communications from the

examiner should be directed to Ing-Hour Lin whose telephone number is (571) 272-1180. The

examiner can normally be reached on M-F (9:00-5:30).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Tom Dunn can be reached on (571) 272-1171. The fax phone number for the

organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
